

## EDC-MixRisk Scientific Conference, 27 March 2019 at DG Research, EC, Brussels

Date and time: 27 March 2019 (9:00-17:30)

Venue: EC-CDMA-DG Research & Innovation, rue du Champs de Mars 21

### Purpose of the Scientific Conference:

The conference aims at bringing together researchers and experts working in the field of endocrine disruptors and chemical mixtures to discuss the scientific results generated within the EDC-MixRisk project and the implications thereof.

EDC-MixRisk has developed a novel whole mixture approach integrating epidemiology and experimental biology to improve risk assessment strategies for endocrine disrupting chemicals (EDCs) in mixtures. The EDC-MixRisk approach and key results will be presented and discussed during the scientific conference.

### Objectives:

- to learn about the EDC-MixRisk study design and proof-of-concept
- to provide highlights of key results and findings generated within the project
- to discuss the applicability of the findings and share the lessons learned
- to discuss potential implications for the future

### Programme:

09:00-09:10	<p><b>Opening session</b> <b>Words of welcome by</b></p> <ul style="list-style-type: none"> <li>- Åke Bergman, EDC-MixRisk Coordinator, and</li> <li>- Representative of the European Commission</li> </ul>
09:10-09:30	<p><b>Setting the stage – Introduction to current regulatory risk assessment and challenges</b> <i>Christina Rudén, Stockholm University</i></p>
09:30-10:30	<p><b>Session 1: Identification of real-life mixtures relevant for children's health and development</b> <i>Chairs: Åke Bergman and Joëlle Rüegg</i></p>
10:30-11:10	<p><b>Session 2: Key events and adverse outcomes induced by real-life exposures in experimental systems</b> <i>Chairs: Joëlle Rüegg and Jean-Baptiste Fini</i></p>
11:10-11:30	<p><b>Coffee break</b></p>

11:30-13:30	<b>Session 2 continues on key events and adverse outcomes induced by real-life exposures in experimental systems</b>  <i>Chairs: Joëlle Rüegg and Jean-Baptiste Fini</i>
13:30-14:30	<b>Lunch (with poster viewing)</b>
14:30-15:30	<b>Session 3: Integration of epidemiological and experimental data for improved strategies for mixture risk assessment</b>  <i>Chairs: Mattias Öberg and Joëlle Rüegg</i>
15:30-16:30	<b>Coffee and Poster presentations</b>
16:30-17:20	<b>Lessons learned – open discussion</b>
17:20-17:30	<b>Concluding remarks</b>
